Summary

This collection was donated by the daughter of the late Christine Laidlaw. The collection contains photographs and related objects from the photo study of Montclair houses by Laidlaw (study done circa 1970's - 1980's), as well as photographs, slides, and other documents related to Laidlaw's work for the Montclair Historical Society and other organizations. Laidlaw was a professional photographer and writer, with a PHD in Art History, and was a docent at the Crane House.

Creator(s):

Christine Laidlaw, Christine I. Laidlaw Cooney (daughter)

Dates:

Ca. 1970s-1980s

Location:

Library (upstairs)

Quantity:

5 boxes

Scope and Content

The types of documents in this collection include (but are not limited to) framed photographs, photographic prints, photo negatives, and slides. Some of the documents were created as early as 1973, but the majority was created in the later 1970s. They consist mainly of original photographs taken by Christine Laidlaw. They pertain to the buildings in Montclair and the programming and history of the Montclair Historical Society/Montclair History Center (MHS/MHC). The photographs pertaining to the MHS/MHC make up a majority of this collection. Box 4 of the collection is comprised of Laidlaw's files and slides generally representing her work as a photographer (and perhaps other matters related to her work). A substantial number of the file folders and

slides are related to her work with the MHS/MHC. In addition, there are folders and slides related to the Victorian Society, the Montclair Art Museum, and other organizations. Dates are mostly between 1973 - 1981.

Arrangement Note

The files in this collection were arranged by Laidlaw and have been kept in relatively the same order. While most of the boxes in this collection contain larger, framed photographs, one box contains an assortment of manila folders with negatives of Laidlaw's photographs related to the MHS/MHC. The manila legal-size folders have been titled by Laidlaw. This collection has been entered as a whole into the PastPerfect database.
